Exam Tips

The strategic aspect…

NOT FOR DISTRIBUTION © Stephane Maarek www.datacumulus.com

Take your time reading the question

- Look for key words about requirements

A large news website needs to produce personalized recommendations for articles **to its readers**, by training a machine learning model **on a daily basis** using historical click data. The influx of this data is fairly constant, except during major elections when **traffic to the site spikes considerably.**

Which system would provide the most **cost-effective** and **reliable** solution?

Pace yourself

- You have 130 minutes and about 65 questions
- That's only 2 minutes per question!
- Try not to get stressed out… that's enough time to read and understand each question.

Flag questions for later review

- If you're stumped on something, don't spend too much time on it
- Select your best guess, and mark it for review
- Then use any time you have at the end to go back and reconsider
- Flag questions you're not totally sure about, too.

Arrive prepared

- Get a good night's sleep
- Do whatever you need to do to stay alert – this test requires stamina
- Go to the bathroom before arriving
- Arrive early – the exam location may be hard to find

Additional prep resources

- AWS Certified Data Engineer exam guide
- AWS's free practice exam
- AWS Skill Builder
- Complete practice exams (when available)
- This shouldn't be your first certification exam

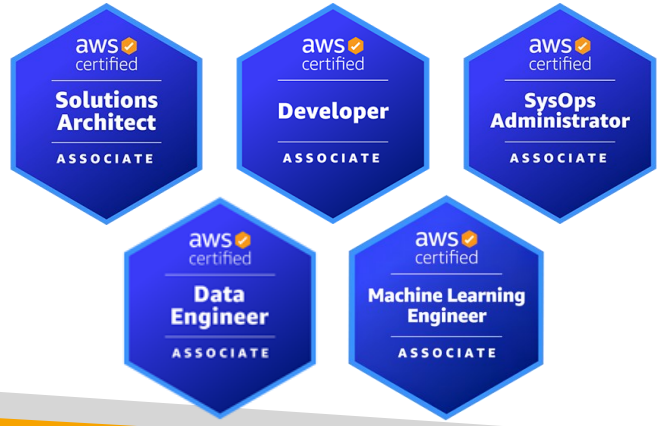
Your AWS Certification journey

Foundational

Knowledge-based certification for
foundational understanding of AWS Cloud.
No prior experience needed.

Associate

Role-based certifications that showcase your knowledge
and skills on AWS and build your credibility as an AWS Cloud professional.
Prior cloud and/or strong on-premises IT experience recommended.



Professional

Role-based certifications that validate advanced skills
and knowledge required to design secure, optimized,
and modernized applications and to automate processes on AWS.
2 years of prior AWS Cloud experience recommended.

Specialty

Dive deeper and position yourself as a trusted advisor to your
stakeholders and/or customers in these strategic areas.
Refer to the exam guides on the exam pages for recommended experience.

AWS Certification Paths – Architecture

Architecture

Solutions Architect

Design, develop, and manage cloud infrastructure and assets, work with DevOps to migrate applications to the cloud

optional for IT/ cloud professionals

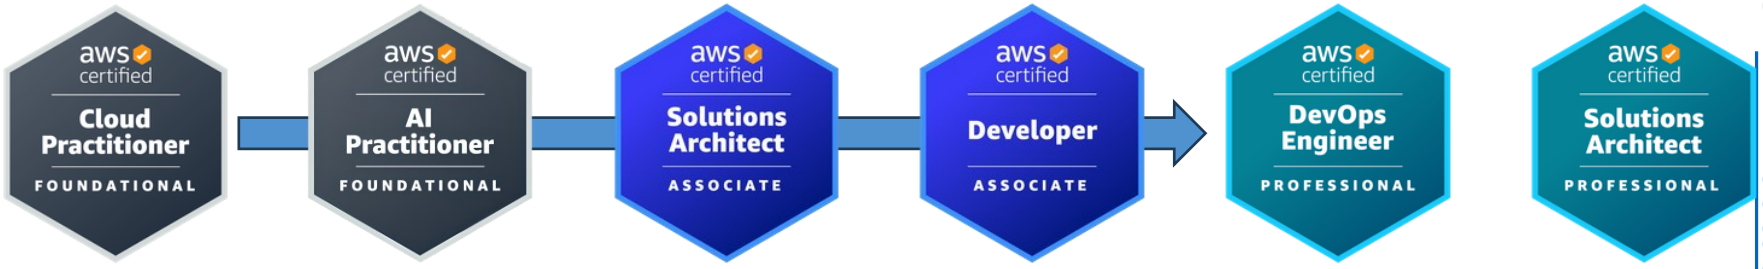
recommended for IT/cloud professionals to leverage AI

Dive Deep

Architecture

Application Architect

Design significant aspects of application architecture including user interface, middleware, and infrastructure, and ensure enterprise-wide scalable, reliable, and manageable systems



optional for IT/ cloud professionals

recommended for IT/cloud professionals to leverage AI

Dive Deep

AWS Certification Paths – Operations

Operations

Systems Administrator

Install, upgrade, and maintain computer components and software, and integrate automation processes

optional for IT/ cloud professionals

Dive Deep

Operations

Cloud Engineer

Implement and operate an organization's networked computing infrastructure and Implement security systems to maintain data safety

optional for IT/ cloud professionals

Dive Deep

AWS Certification Paths – DevOps

DevOps
Test Engineer
Embed testing and quality best practices for software development from design to release, throughout the product life cycle

optional for IT/ cloud professionals

DevOps
Cloud DevOps Engineer
Design, deployment, and operations of large-scale global hybrid cloud computing environment, advocating for end-to-end automated CI/CD DevOps pipelines

optional for IT/ cloud professionals

Optional | recommended for IT/cloud professionals working on AI/ML projects | **Dive Deep**

DevOps
DevSecOps Engineer
Accelerate enterprise cloud adoption while enabling rapid and stable delivery of capabilities using CI/CD principles, methodologies, and technologies

optional for IT/ cloud professionals

recommended for IT/cloud professionals working on AI/ML projects

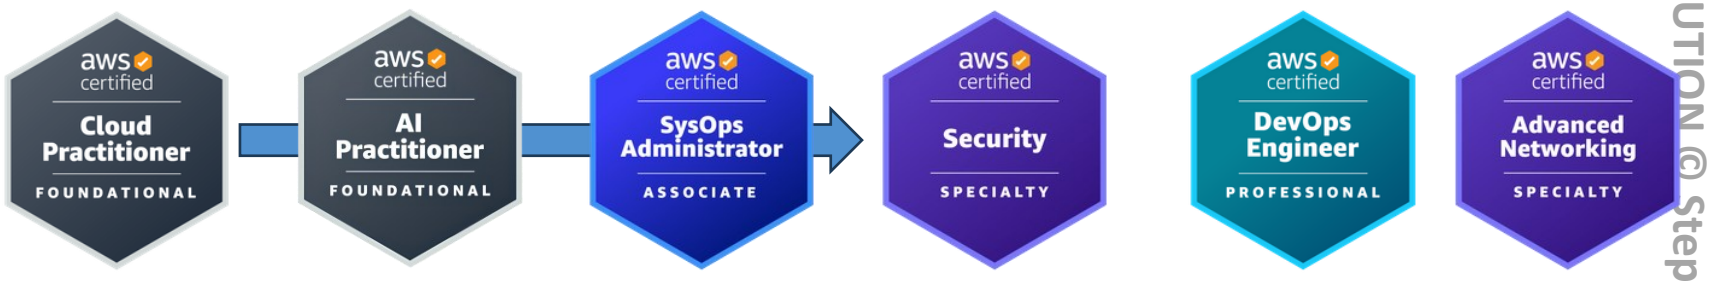
AWS Certification Paths – Security

Security

Cloud Security Engineer

Design computer security architecture and develop detailed cyber security designs. Develop, execute, and track performance of security measures to protect information



optional for IT/ cloud professionals

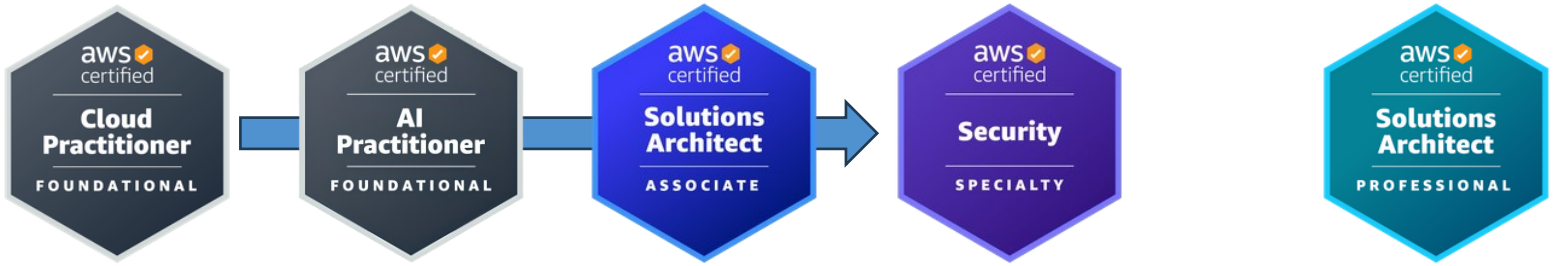
recommended for IT/cloud professionals to secure AI/ML systems

Dive Deep

Security

Cloud Security Architect

Design and implement enterprise cloud solutions applying governance to identify, communicate, and minimize business and technical risks



optional for IT/ cloud professionals

recommended for IT/cloud professionals to secure AI/ML systems

Dive Deep

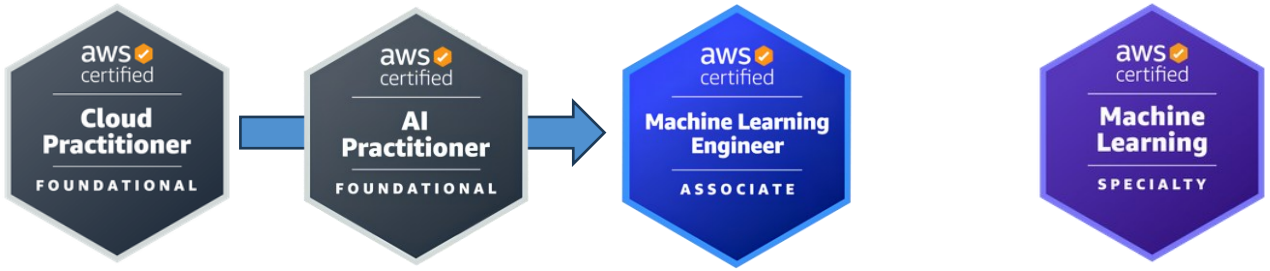
AWS Certification Paths – AI/ML

AI/ML
Prompt Engineer
Design, test, and refine text prompts to optimize the performance of AI language models



optional for IT/ cloud professionals

Dive Deep

AI/ML
Machine Learning Ops Engineer
Build and maintain AI and ML platforms and infrastructure. Design, implement, and operationally support AI/ML model activity and deployment infrastructure

optional for IT/ cloud professionals

optional for AI/ML professionals

AI/ML
Data Scientist
Develop and maintain AI/ML models to solve business problems. Train and fine tune models and evaluate their performance

optional for IT/ cloud professionals

optional for AI/ML professionals
